

Shivanshu Tiwari

Data Analyst

+917052327079 • shivanshutiwari.ml@gmail.com • [Linkedin](#)

PROFESSIONAL SUMMARY

Data Analyst with applied Machine Learning and Automation Experience, working on pricing, churn prediction, and data-driven decision systems

SKILLS

Programming	: Python, SQL, Linux
Data Engineering	: Extract Transform Load, Pipelines, Data Cleaning, Pandas, NumPy
Machine Learning	: Regression Model, Classification Model, Exploratory Data Analysis, Feature Engineering, Scikit-Learn
Visualization	: Excel, Power BI
MIOps	: Git, Docker, FastAPI

PROJECTS

Customer Churn Analysis, [Link](#)

- Developed a machine learning classification model achieving 80% accuracy in predicting customer churn using Random Forest/XGBoost on 7,043 records with 21 features to prevent revenue loss
- Performed EDA, feature engineering, and correlation analysis, identifying contract type, payment methods, and demographics as top churn drivers; applied PCA for dimensionality reduction, capturing 85%+ variance
- Optimized model performance using K-fold cross-validation and GridSearchCV, evaluating with precision, recall, F1-score, and confusion matrix to minimize false negatives
- Deployed production-ready FastAPI backend with RESTful endpoints for real-time churn prediction, enabling business teams to implement targeted retention strategies

Vehicle Insurance Data Pipeline, [Link](#)

- Engineered production-grade vehicle insurance ML pipeline processing 100K+ records, implementing data ingestion from MongoDB Atlas, feature engineering, and model training with 95%+ validation accuracy
- Deployed ML models on AWS with model versioning through a containerized Docker architecture
- Built CI/CD pipeline using GitHub Actions, achieving zero downtime deployments, integrating MongoDB, AWS services, and self-hosted runners for continuous model retraining and API serving
- Best Practices:** Modular design, custom logging/exception handling, schema validation, environment-based configuration management

WORK EXPERIENCE

Amazon

Client Support Analyst, Gurugram, India

Mar 2024 — Present

Accelerated seller growth by 35% QoQ while maintaining 18%+ profitability through data-driven funnel analysis and high-value action prioritization across 500+ sellers

- Increased first-year seller retention by 25% through friction reduction initiatives and risk mitigation mechanisms, impacting 1,000+ new sellers annually
- Drove 30% improvement in product availability and 35% reduction in listing defects through quality assurance frameworks
- Implemented seller performance tracking mechanisms, reducing review cycle time by 50% and improving goal attainment by 28%
- Built and managed a high-performing team of account managers, achieving 120% of target performance

Concentrix

Technical Support Analyst, Gurugram, India

Sep 2022 — Feb 2024

Resolved escalated technical tickets by identifying root cause patterns across CRM data, reducing recurring issues by 18%

- Promoted to Senior Representative by leveraging data-driven performance metrics and consistently ranking in the top 5 in my span
- Developed training modules and process documentation that improved team efficiency by 25% and reduced onboarding time by 30%

EDUCATION

Chhatrapati Shahu Ji Maharaj University, Kanpur , India - *B.Sc., Mathematics*

Sep 2019 — May 2022
